Forecast for Tuesday 07 Feb 2023

Weather: Occasional mist and fog patches at first in valleys, slowly lifting and breaking. These are likely to re-form again during the evening. Otherwise, a dry and bright day with sunny spells.

Chance of cloud-free hill tops above 800m: 80%

Low Cloud and visibility: Mist and fog patches in valleys giving poor or very poor visibility, both early and late in the day. This may give some brief visibility deteriorations as fog lifts during the morning. Perhaps some patches of cloud with base around 600m mainly in the west of the Park. Visibility mostly good or very good, but poor or very poor in any mist, freezing fog or cloud covering hills.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Due to cold air pooling in valleys, freezing level will reach the surface at lower levels early morning and late evening.

Forecast for Wednesday 08 Feb 2023

Weather: Some early mist and freezing fog possible, otherwise dry and bright with strengthening southwest winds. Thickening cloud with outbreaks of rain and summit snow possible later in the evening.

Maximum wind: South or Southwest 30-35mph gusts 40-45mph during the afternoon and evening.

Chance of cloud-free hill tops above 800m: 70% daylight hours, falling 30% during the evening.

Low Cloud and visibility: Mist and fog patches in valleys giving poor or very poor visibility at first. This may give some brief visibility deteriorations as fog lifts during the morning. Occasional cloud developing above around 600m during the afternoon, becoming extensive above 500m late evening. Visibility mostly good or very good, but very poor in any morning fog and cloud covering the hills later.

Temperature: **Valleys:** Minus 1 Celsius rising to 7 Celsius
At 800m: Around Zero Celsius
Freezing level: Most levels at first in early frost, rising 800m.
